PROFILE

Salesforce Developer with strong expertise in Apex, LWC, Flow automation, and complex integrations. I bring 9+ years of full-stack development experience (Node.js / React / APIs), allowing me to contribute beyond declarative solutions and handle architecture-heavy projects when needed. More at kevinshirley.com | github.com/kevinshirley

EMPLOYMENT HISTORY

Senior Salesforce Developer, Investissement Québec — Montreal

Apr 2026 — Present

- Developed and implemented JWT Bearer OAuth authentication flows for secure document generation platform and DocuSign integrations, meeting mandatory Salesforce MFA security compliance deadlines.
- Designed and deployed enterprise-scale Flow automation and Apex logic leveraging bulkified patterns to optimize governor limits and high-volume batch processing.
- Integrated third-party platforms with Salesforce file architecture for automated document generation and signature workflows.
- Translated business requirements from key stakeholders into technical specifications through functional analysis; architected scalable Salesforce solutions and documented implementation patterns for team knowledge transfer.

Skills: Salesforce, Apex, Flow, DocuSign, OAuth, API Integration

Senior Salesforce Developer, Equativ — Montreal

Jan 2025 — Apr 2026

- Designed and implemented Apex trigger handlers and service-layer logic (CampaignBuilder, EnvelopeStatusHandler, validation services).
- Built and refactored Lightning Web Components to support campaign configuration and pricing management workflows.
- Implemented automation for Quote → Campaign creation, billing method standardization, and document transfer using ContentDocumentLink.
- Integrated DocuSign envelope status updates to automatically transition business records upon signature completion.
- Developed bulk-safe Apex logic aligned with Salesforce governor limits and enterprise best practices.
- Contributed to revenue and billing logic improvements, including currency-aware implementations and Snowflake data mapping.
- Worked within Salesforce DX workflows using scratch orgs, GitLab repositories, and CI/CD pipelines.
- Collaborated with cross-functional teams (Finance, Operations, Product) to align technical implementation with business requirements.

Skills: Salesforce, Apex, Lightning Web Components, DocuSign, Snowflake, CI/CD, GitLab, Salesforce DX

Senior Software Developer Consultant, ACQ — Montreal

Jul 2024 — Jan 2025

- Maintained and enhanced a React and Node.js client portal, managing API calls to retrieve and display data from an internal SuiteCRM application.
- Refactored business logic from the legacy CRM into Salesforce Apex backend services and custom Lightning Web Components for improved maintainability and scalability.
- Deployed and managed cloud-based applications on AWS and Azure, including setting up CI/CD pipelines to ensure scalability, reliability, and efficient deployment.
- Maintained a Java middleware API connecting the CRM database to the React built client portal and the Wordpress website, ensuring reliable and secure data exchange.

Skills: SuiteCRM, Salesforce, React, Node.js, Java, Azure, API Development

HOBBIES

Gym, Stocks, Real Estate

Senior Software Developer Consultant, Blue Cross
Montreal
Oct 2023 — Jul 2024

- Developed and customized Salesforce solutions for an insurance company, including CPQ implementations and Lightning Web Components, to streamline the quoting and sales processes.
- Maintained and enhanced a React Native client portal, managing API calls to retrieve and display data from an internal Salesforce application.
- Deployed and managed cloud-based applications on AWS and Azure, including setting up CI/CD pipelines to ensure scalability, reliability, and efficient deployment.
- Maintained a Java middleware API connecting the Salesforce database to React and React Native apps, ensuring reliable and secure data exchange.

Skills: Salesforce (CPQ, Lightning Web Components, Apex), React, React Native, Node.js, Java, AWS, Azure

Senior Software Engineer, Morningstar
Montreal
Nov 2022 — Oct 2023

- Develop and maintain web applications using React, Vue.js, and Node.js.
- Implement and manage state using Redux for complex front-end applications.
- Design and implement scalable AWS infrastructures for applications.
- Build and manage CI/CD pipelines using AWS services such as CodePipeline, CodeBuild and CodeDeploy.
- Mentor junior engineers and conduct code reviews.
- Optimize application performance and troubleshoot issues using CloudWatch logs.
- Collaborate with cross-functional teams and stakeholders.
- Implement data visualization solutions for various B2B financial SaaS products.
- Maintain various Node.js REST APIs to consume internal microservices with AWS ApiGateway.

Skills: React, Vue, NodeJs, AWS, CI/CD, Docker, Javascript/Typescript, Unit Testing

Full Stack Developer, Desjardins
Montreal
Jun 2021 — Nov 2022

- Built custom LWC components with Javascript and Apex to extend Salesforce functionality for a financial institution's internal platform.
- Create reusable code and libraries for future use.
- Ensure user technical accessibility in UI/UX designs.
- Optimize components for maximum speed and scalability.
- Collaborate with other team members and stakeholders.
- Manage builds, testing, deployments with CI/CD pipelines on AWS.

Skills: React, Salesforce, NodeJs, Docker, CI/CD, Javascript/Typescript, Unit Testing

Full Stack Developer, ALDO Group
Montreal
Apr 2019 — Jun 2021

- Develop new user-facing and server-side features.
- Build reusable code and libraries for future use.
- Ensure the technical feasibility of UI/UX designs.
- Optimize applications for maximum speed and scalability.
- Assure that all user input is validated before submitting to back-end services.
- Developed custom Apex services to integrate Salesforce with various eCommerce backend applications.
- Collaborate with other team members and stakeholders.
- Interact with many APIs configured on AWS API Gateway and AWS Lambda.
- Manage builds, testing, deployments with CI/CD pipelines on AWS.

Skills: React, Redux, CSS, NodeJs, AWS, Salesforce, CI/CD, API, Javascript/Typescript

Full Stack Developer, FlightHub
Montreal
Oct 2018 — Apr 2019

- Built a custom web application to transition from the Salesforce contact center solution to an in-house contact center platform for greater flexibility and control.
- Integration of numerous APIs such as Twilio, Amazon Web Services, and more.
- Development of multiple features using technologies such as Laravel, React, Redux, MySQL, MongoDB and more.
- Continuous application refactoring for performance.

Skills: React, Redux, CSS, PHP/Laravel, API, Twilio, Salesforce, Javascript/Typescript, MySQL, MongoDB

Front-End Developer, Levio Montreal
Oct 2017 — Oct 2018

- Pension fund management application.
- Development of several front-end features in Angular / TypeScript, in a .Net / C# / Java / WebSocket back-end environment.
- State of the front-end application manage with Redux.
- Each features validated by unit tests.
- Agile Team Environment.

Skills: Angular, Redux, Typescript, CSS, WebSocket, Unit Testing

EDUCATION

Computer Science, College de Maisonneuve Montreal
2016 — 2017

INTERNSHIPS

Web Developer Intern, Adviz Media Montreal
2017

- Several sites for different clients of the agency
- Development of several web pages and front-end features in HTML5 / CSS3 / jQuery / JavaScript. Development of back-end functionalities for Wordpress and/or other PHP frameworks
- HTML4 email development
- Image processing and graphic design with Adobe PSD / AI
